Tools for a Successful Transition

According to the Bureau of Justice Statistics, over 1,600,000 people are currently serving a prison sentence and more than 95% of them will be released. Sadly, over half of those who come home will be rearrested within three years - often because they lack opportunity, information and resources. In most cases this is an avoidable tragedy for the former inmate and an unnecessary burden to the taxpayer.

Fair Shake serves as a hub where we - the reentry stakeholders - share ideas, tools and resources to build the bridges of trust necessary for creating strong and safe communities. Through a blend of education, technology and determination we can reduce the high cost of criminal justice while protecting community safety.

For safer and stronger cities and communities, we must improve our reentry outcomes. We all deserve a fair shake.
